Engineering Manager with 6+ years of software engineering experience, including 4+ years leading cross-functional engineering teams delivering customer-facing, revenue-critical software. Proven track record driving AI adoption, scaling engineering teams, and delivering high-impact platforms supporting hundreds of millions in annual revenue.

Work Experience

SelectQuote Insurance Services / Kansas City, MO (remote)

Engineering Manager, August 2026-Present

- Promoted to Engineering Manager after expanding leadership responsibilities across multiple engineering teams.

Engineering Supervisor, April 2022-August 2026

- Led two cross-functional engineering teams comprising 12+ software engineers, 4 QA analysts, 2 project managers, and 2 BPOs, delivering customer-facing software for SelectQuote's largest business division, Senior Health Insurance.
- Owned the success, scalability, and operational health of two mission-critical platforms (Senior CRM and Senior Quote Engine) supporting SelectQuote's largest business line.
- Led the development and evolution of core business applications generating ~\$250M in annual revenue, ensuring scalability, reliability, and long-term maintainability.
- Directed annual AEP readiness for revenue-critical systems, coordinating feature delivery, platform hardening, staffing, and operational planning to ensure stability during the company's highest-volume business period.
- Led engineering delivery of AutoEnroll, an AI-powered voice automation platform built on Retell AI, designed to automate post-sale customer enrollment workflows previously handled by human agents.
- Led cross-organizational delivery of the Select Local integration with Senior Quote Engine, a top organizational priority that established AI-assisted development practices for future engineering initiatives.
- Drove AI engineering adoption across multiple teams by introducing Kiro, implementing AI SDLC practices, and leading structured AI education for senior engineers and technical leaders.
- Provided technical direction and architectural guidance across Node.js and React platforms while coaching senior engineers and technical leads.

Software Engineer I, September 2021–April 2022

- Led a critical modernization effort as technical lead, replacing a legacy lead-ingestion platform with a Node.js service that delivered hundreds of thousands of dollars in annual cost savings.
- Promoted from Software Engineer I to Engineering Supervisor within six months based on performance, technical impact, and rapid growth while contributing across full-stack, revenue-critical systems supporting SelectQuote's largest business line.

Allusion Software / Wellington, FL

Software Engineer, May 2021–September 2021

- Developed full-stack applications using React, Node.js, and Firebase, delivering CRM and tracking solutions for clients.
- Built reusable UI components and backend services supporting rapid delivery across multiple client projects.

Education

Florida Atlantic University / B.S. Computer Science / 2020
